

CLAIMS:

1. An apparatus having an enclosure and a flexible hose extending from the enclosure, the enclosure adapted to contain a mosquito coil/candle/vaporising device, an inlet to allow air to pass into the enclosure,
5 an outlet to allow air to pass out of the enclosure, and a fan to pass the air from the inlet and through the outlet, the air at least partially entraining smoke/gas/vapours emitted from the device, the outlet being in fluid communication with the hose to enable the smoke/gas/vapours to pass through the hose and to a position remote from the enclosure, the hose
10 having at least one outlet through which the smoke/gas/vapours can pass.
2. The apparatus of claim 1, wherein the hose has a length of several meters.
3. The apparatus of claim 2, wherein the hose has a multiplicity of perforations which comprise the at least one outlet.
- 15 4. The apparatus as claimed in claim 1, wherein the enclosure is provided with a door.
5. The apparatus as claimed in claim 1 wherein the inlet comprises at least one opening in the door.
6. The apparatus as claimed in claim 1, comprising a shroud
20 extending about the fan.
7. The apparatus as claimed in claim 1, comprising a second enclosure which is separate from the enclosure, the second enclosure containing the fan.
8. The apparatus as claimed in claim 1, comprising a second
25 enclosure, the fan having fan enclosure provided with an inlet, inlet to the fan enclosure comprising an opening in a partition which separates the second enclosure from the enclosure.
9. The apparatus as claimed in claim 8, wherein the partition comprises a dividing wall.
- 30 10. The apparatus as claimed in claim 8, wherein the outlet of the fan enclosure comprises a tapering enclosed portion which tapers towards an outlet in a wall of the apparatus.
11. The apparatus as claimed in claim 1, wherein the fan has an

intake area and an outlet area, the intake area being adjacent the inlet to prevent smoke laden air from passing through the fan.

12. The apparatus as claimed in claim 1, wherein a wall of the apparatus is provided with a power socket to allow an electrical power supply to power the fan.

13. The apparatus as claimed in claim 1, wherein the enclosure is provided with a power socket to allow a plug in vaporiser to plug into the power socket.

14. The apparatus as claimed in claim 1, wherein a mosquito coil is placed in the enclosure.

15. The apparatus as claimed in claim 1, wherein a mosquito candle is placed in the enclosure.

16. The apparatus as claimed in claim 1, wherein a deodorising agent is placed in the enclosure.

17. The apparatus as claimed in claim 1, wherein a fragrance emitting agent is placed in the enclosure.

18. The apparatus as claimed in claim 1 wherein the outlet is associated with a venturi.

19. The apparatus of claim 8 teams wherein the fan is in a housing, the housing having an outlet, the outlet passing pressurised air into one end of the venturi.
